

Digital Print on the Window

Achieve maximum individuality with the innovative print technology I-tec Decor

Nothing compares to

Internorm[®]
Windows – Doors

I-tec Decor

I-tec Decor

With the new I-tec Decor, the surfaces of your internal window profiles can be matched to your furniture, floors or doors. The new digital printing technology works in a similar way to an inkjet printer, allowing you to create a more personalised, unique home.

The technology of the future

Digital printing now at Internorm

The I-tec Decor design is applied in multiple layers to the internal uPVC profile. An additional top coat provides protection against UV radiation and commercially available cleaning agents. With the new I-tec Decor digital printing technology, we can offer eleven distinct designs on the inside of KF 310, KF 410 and KS 430 systems, which will blend beautifully into your interior design.
